Introduction

Document Purpose

Example of the initial qualitative questions for the questionnaires for both therapists and patients of the voluntary institution for research.

These questions are initially to learn more about the real situation of patients and therapists in more detail, and then we can proceed to a deeper analysis in which we can create metrics along with more quantitative questionnaires on more specific topics of a specific visible problem

Data Collection questionnaire proposal

For elderly

1. What kind of activities do you enjoy doing on a daily basis?
2. Do you have any difficulty doing these activities?
3. if so if you have any solution that you use please describe how you solve it
4. could you briefly describe your routine please?
5. Do you know or usually use technology such as smart phones or laptops?
6. if you don't use them a lot you could share the reasons why you decide not to use them
7. If you use them, could you share what you normally use them for?
8. what are your own activities or hobbies if you can share them with us
9. the activities that it carries out consider that they require over effort or, on the contrary, that they are easy to carry out.
